

Eumobase concentrated rehydration cream

Eumobase concentrated rehydration cream is an emollient that is specially formulated to moisturise:

- Dry, sensitive, itchy skin
- Skin prone to flare-up of eczema and dermatitis

Eumobase moisturises and protects your skin by replenishing the water that has been lost, and retaining the moisture deep within the skin. Eumobase has a special dermatological formula to help your skin stay soothed, supple and protected all day long.

Eumobase concentrated rehydration cream:

- Unique intense moisturising action
- Easy absorption provides high levels of skin hydration
- Non greasy, dermatological formula
- Suitable for all ages, including babies and children

Available in 30g or 100g tubes

Eumobase is now available from your local pharmacy or supermarket
